Lesson page template

L00

Zones, backplane nets and drawing marks from page standard v0.1. Nothing to build.

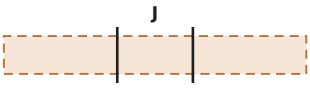
H1 BUS A

Fold switch (optional)

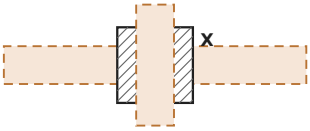
Drawing marks

Lane lay 5 mm copper tape here, one piece per run

Corner fold along the crease; never cut

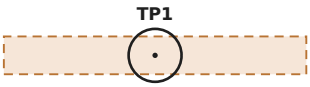


J Joint cut, overlap 10 mm, solder



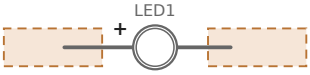
X Crossing insulating patch before the upper strip

H2 V+



TP Test point put a meter probe here

R Resistor ¼ W, actual size, across a 10 mm gap



LED + marks the anode, the long leg

D Diode the band marks the cathode

H3 GND

Build zone · tape lanes, parts and test points

Bus B gutter

H4 BUS B

Schematic
same labels as the parts

Predict What will happen, and why?

Measure Write the readings at each test point.

Explain Did it match? What surprised you?

Print at 100 %: this bar should measure 100 mm.
